

# *Installation Guide*

## *Aux Audio Harness*

Document part number 65248R1

Shown below is a generic KTG, Inc. auxiliary audio patch cable. This cable is used to connect a KTG, Inc. interface device to a bike's auxiliary audio input. Regardless of bike type, connect the harness jack, J1 to the Kennedy Technology interface device.

Locate the bike's auxiliary audio input connector and connect the harness' bike specific connector to it.
